- IV. All HPE sample must go through Pathology Department of Hospital Kota Marudu
  
- V. All sample must be well preserved as recommended by the Lab.
  
- VI. HPE sample for forensic/medico-legal cases must be send by Police personel.

## **2.0 CRITERIA FOR TISSUE HPE DELIVERY TO HOSPITAL QUEEN ELIZABETH, KOTA KINABALU**

### **1. Lump and Bump**

Not all tissues are sent routinely for HPE - only those deemed suspicious. Suspicious means - fit the features of Carcinoma (both primaries and secondaries).

Some of the features of malignancies are:

- a) Attachment of the lump to the overlying and underlying tissues.
- b) Ulcerative.
- c) Firm/hard in consistency.
- d) Irregular surface.
- e) History of the lesion must be taken into consideration such as
  - I. progression of the lump.
  - II. presence of pain (pain may come into picture in a later stage)

### **2. Lymph Nodes**

All cervical, submandibular, axillary, Inguinal Pre/Post Auricular, Occipital and other lymph nodes should be sent for HPE as a routine procedure.

### **3. Breast Lump**

All breast lump should be sent for HPE as a routine procedure.

### **4. Appendix**

All appendicular tissue are sent for HPE as routine unless it is deemed suspicious

### **5. Endometrial tissues**

All endometrial tissues are sent for HPE in case of

- 1) DD & C
- 2) Molar Pregnancy

### **6. Product Of Conception (POC )**

Tissues are sent for HPE if the patient had history of Molar Pregnancies before or/if the tissues are suspicious.

### **7. BTL**

All fallopian tubes are sent for HPE as a routine procedures.

## **8. Others**

### i) Post Mortem

Organ or part of organ may be taken and sent for HPE as per advice by pathologist.

### ii) HPE tissue selection will be under supervision of Histopatologist from time to time.
